Polynomials	5 Problems

8-56. Write a polynomial equation for a graph that passes through the point $(-1,60)$ and has three x-intercepts: $(-4,0)$,$(1,0)$, and $(3,0)$. Homework Help ✎

8-57.
The x coordinates of the x-intercepts of a quadratic polynomial are given below. Find a possible quadratic equation in standard form. Homework Help ✎

a. $x = \frac{3}{4}$, $x = -2$

b. $x = -\sqrt{5}$, $x = \sqrt{5}$

8-70. Write each of the following expressions in the form $a + bi$. Homework Help ✎

a. $-18 - \sqrt{-25}$

b. $\dfrac{2 \pm \sqrt{-16}}{2}$

c. $5 + \sqrt{-6}$

8-71. Explain why $i^3 = -i$. What does i^4 equal? Homework Help ✎

8-72. If $f(x) = x^2 + 7x - 9$, calculate the values in parts (a) through (c) below. Homework Help ✎

a. $f(-3)$

b. $f(i)$

a. $f(-3 + i)$

8-75. Is $(x - 5)^2$ equivalent to $(5 - x)^2$? Explain why or why not. Homework Help ✎
